STAINLESS AND ACID-RESISTANT STEEL PRODUCTS

#COMFORT
#BEAUTY
#FUNCTIONALITY

KESMET has specialised in making products from stainless and acid-resistant steel for 30 years. The gained experience and its modern machinery park allow us to offer products of highest quality. They meet all standards of health quality, which is confirmed by the received Certificate of the Polish National Institute of Hygiene. A modern style of KESMET linear shower drains combined with precision care of details not only ensure a perfect drainage system, but also enrich the interior of your bathroom. Functionality, safety and modern design – these are features of the latest KESMET products.

KNF LINEAR SHOWER DRAIN WITH A FLANGE - METAL TRAP

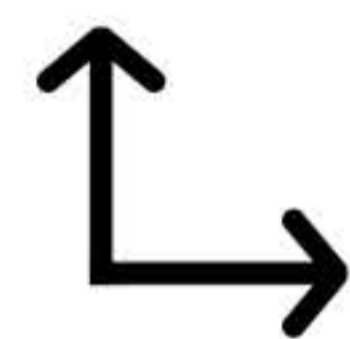

PRODUKT
POLSKI

PRODUCT DESCRIPTION

Flanged drains are currently the most popular solution in bathrooms, saunas and swimming pools. The linear drain is connected with the building drainage system. Subsequently, we fill in the empty space around the drain with concrete mortar. The slope of the bed surface and flooring within the showering zone should be 1.5-2%. We recommend applying an insulation piece, which adds extra hydro-insulation in the area of the linear shower drain, protecting the shower base against water penetrating under the flooring.

BASIC FEATURES

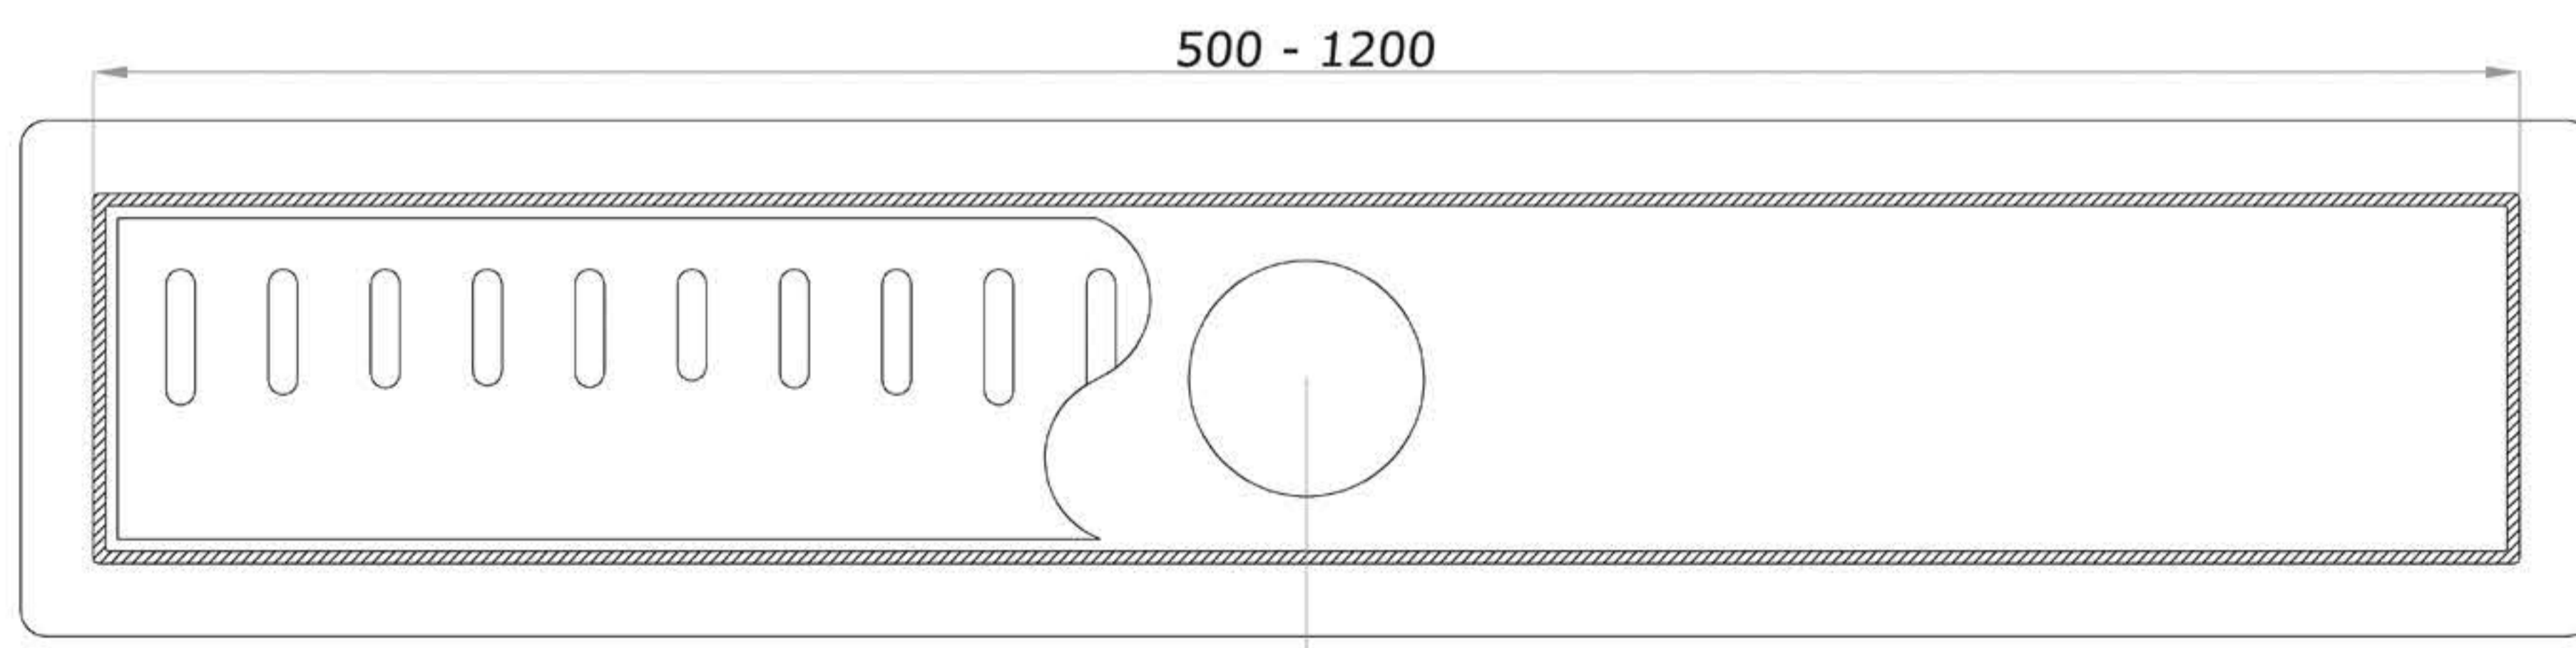

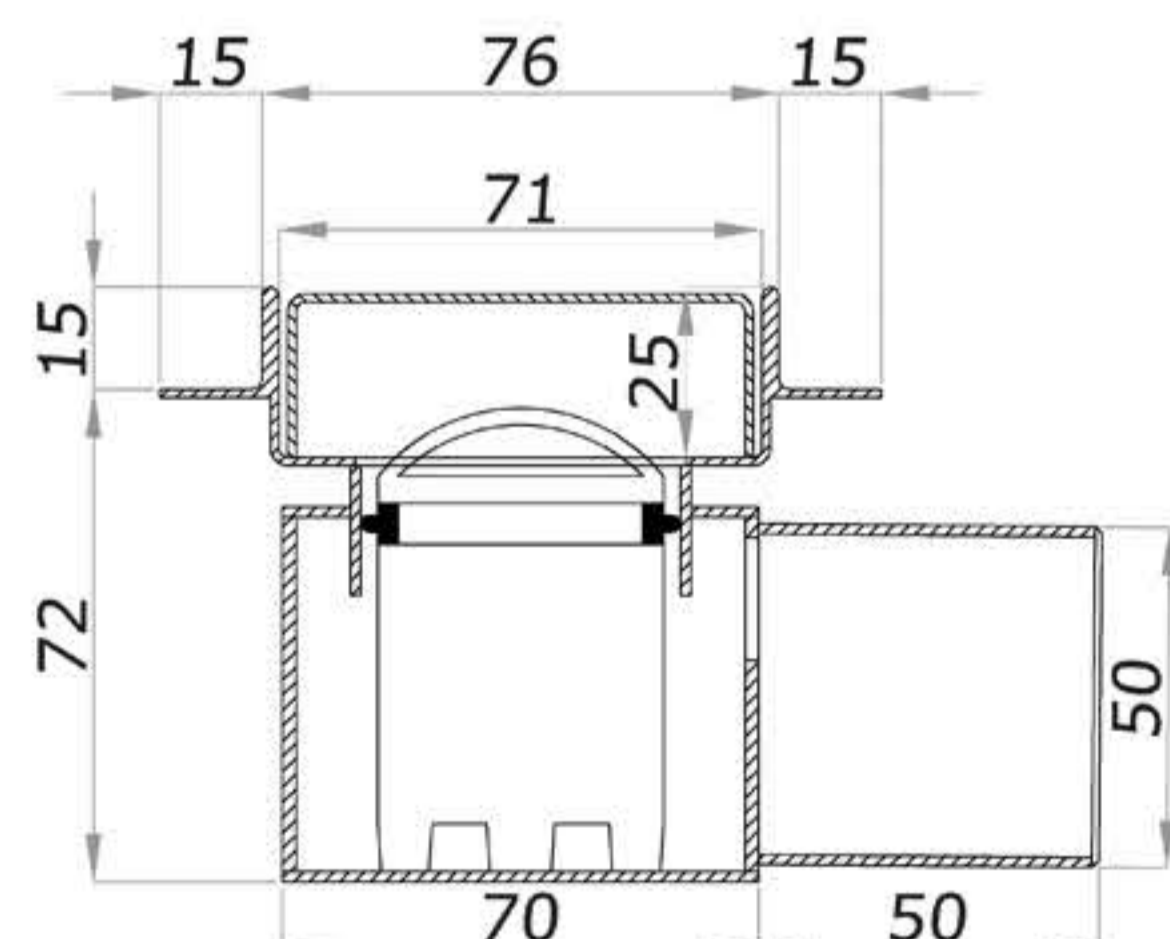

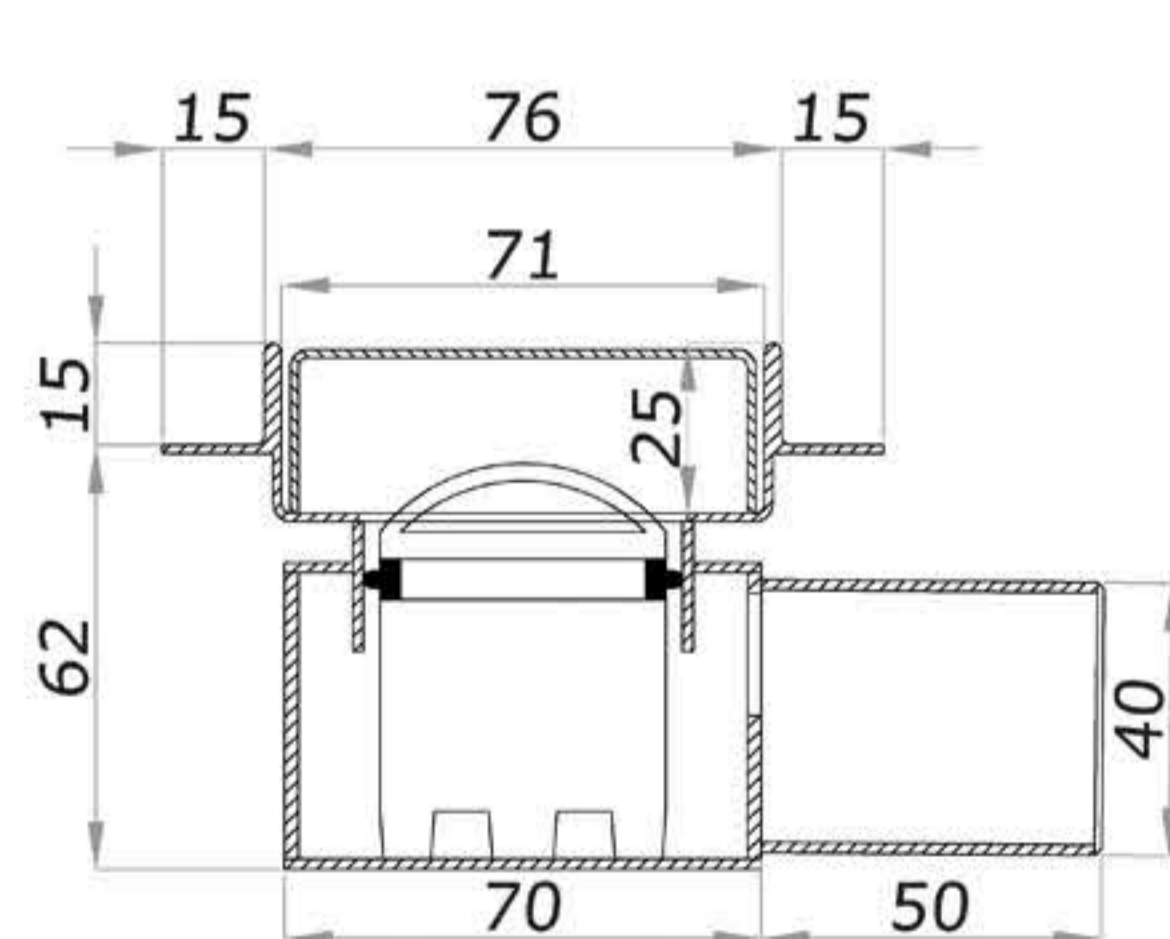

- stainless steel, 1.2 mm thick, grade 304 or 316 depending on the application
- stainless trap, DN 40/50
- possibility to move the trap along the drain and turn it by any angle
- wide offer of drain covers (10 models) made of ground stainless steel
- possibility to personalise the pattern of the drain cover
- highly aesthetic finishing of visible elements
- the flange improves tightness and makes installation easier
- easy to clean

AVAILABLE SIZES:

from 500 mm to 1200 mm

any lengths available
on request

SHOWER DRAIN WITH A METAL TRAP Ø 40/50

length / index	height to the flange	width	Ø

KWF LINEAR SHOWER DRAIN WITH A FLANGE – METAL TRAP

PRODUKT
POLSKI

PRODUCT DESCRIPTION

A brilliant solution where we intended to place the drain near the wall. An additional curve makes installation easier and improves the tightness of the entire set. Drains of such sort is installed by the wall. The shower drain is installed simply, quickly and precisely thanks to extra fastenings mounted on the curved flange.

BASIC FEATURES

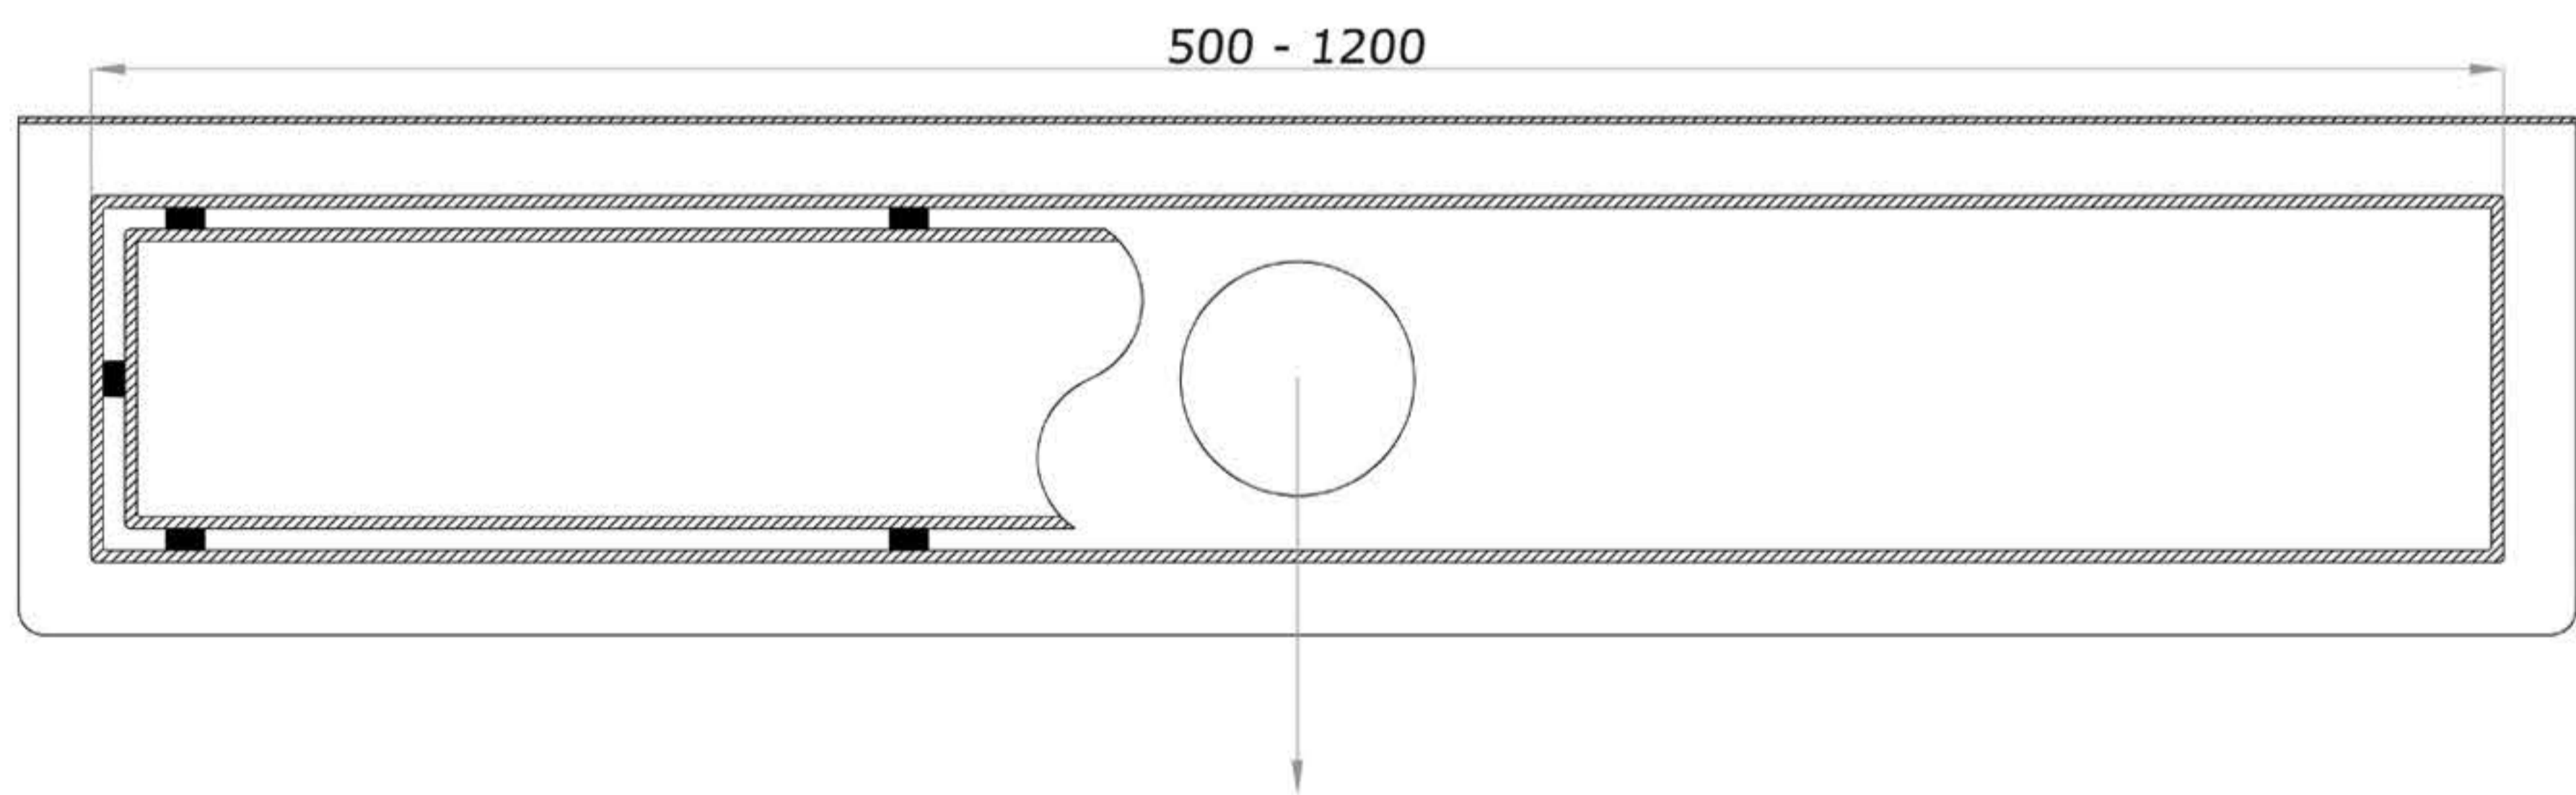

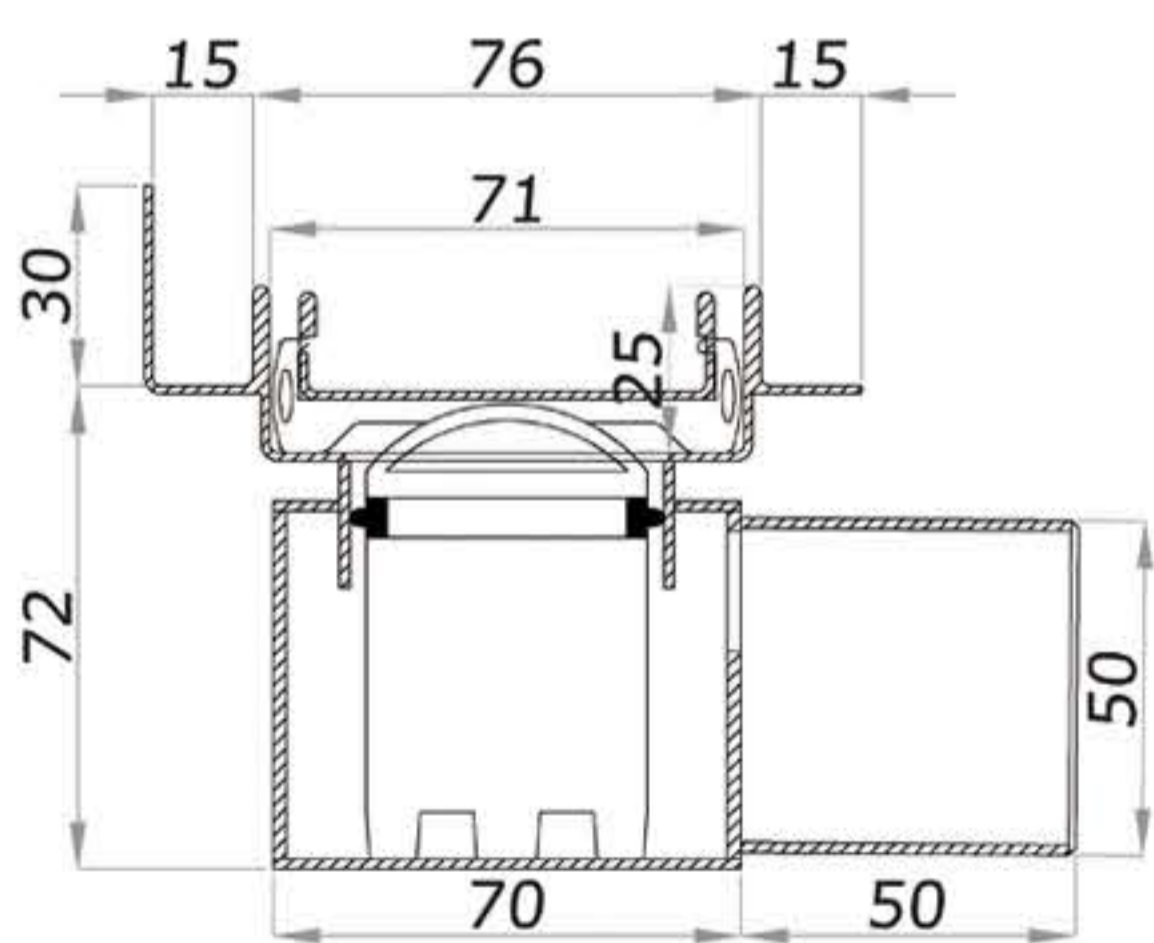

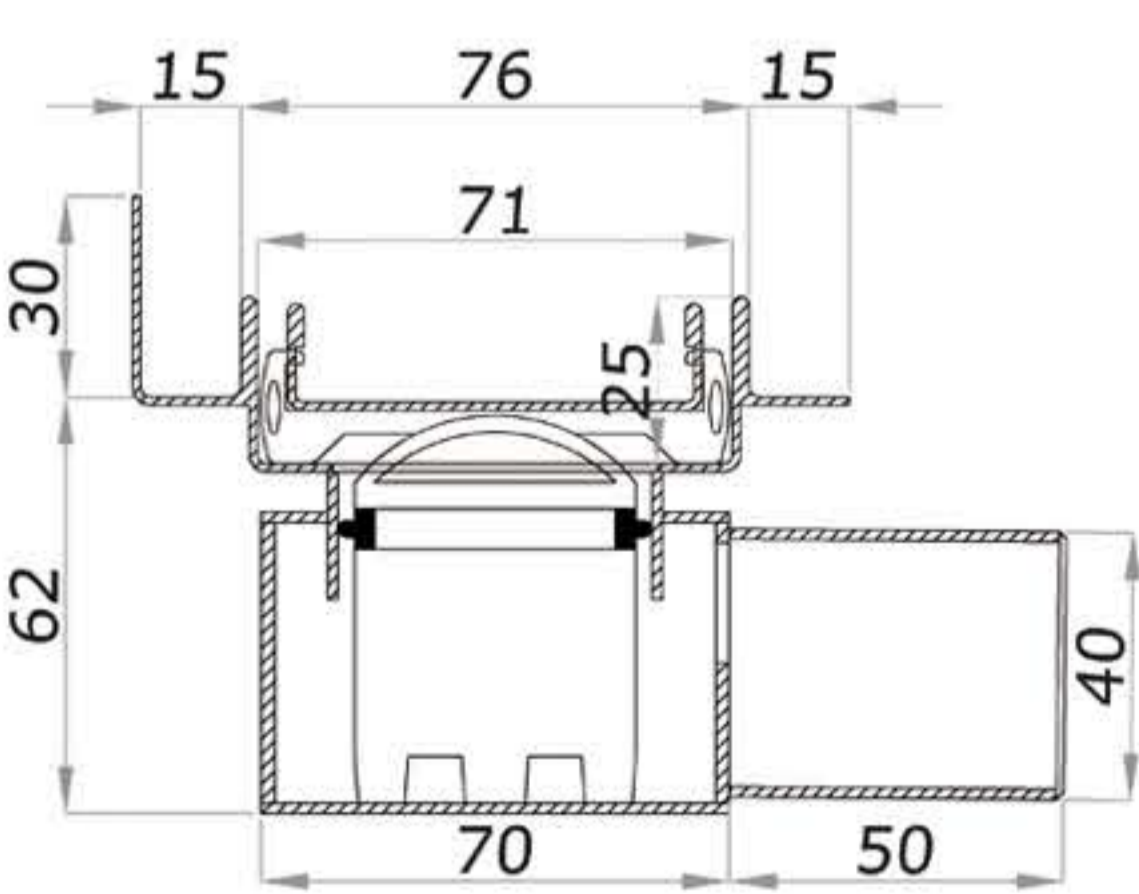

- perfect solution for modern bathrooms
- stainless steel, 1.2 mm thick, grade 304 or 316 depending on the application
- stainless trap, DN 40/50
- possibility to move the trap along the drain and turn it by any angle
- wide offer of drain covers (10 models) made of ground stainless steel
- possibility to personalise the pattern of the drain cover
- highly aesthetic finishing of visible elements
- a flange with an extra curve towards the wall makes the shower drain perfectly tight along its entire circumference and makes installation easy
- easy to clean

AVAILABLE SIZES:

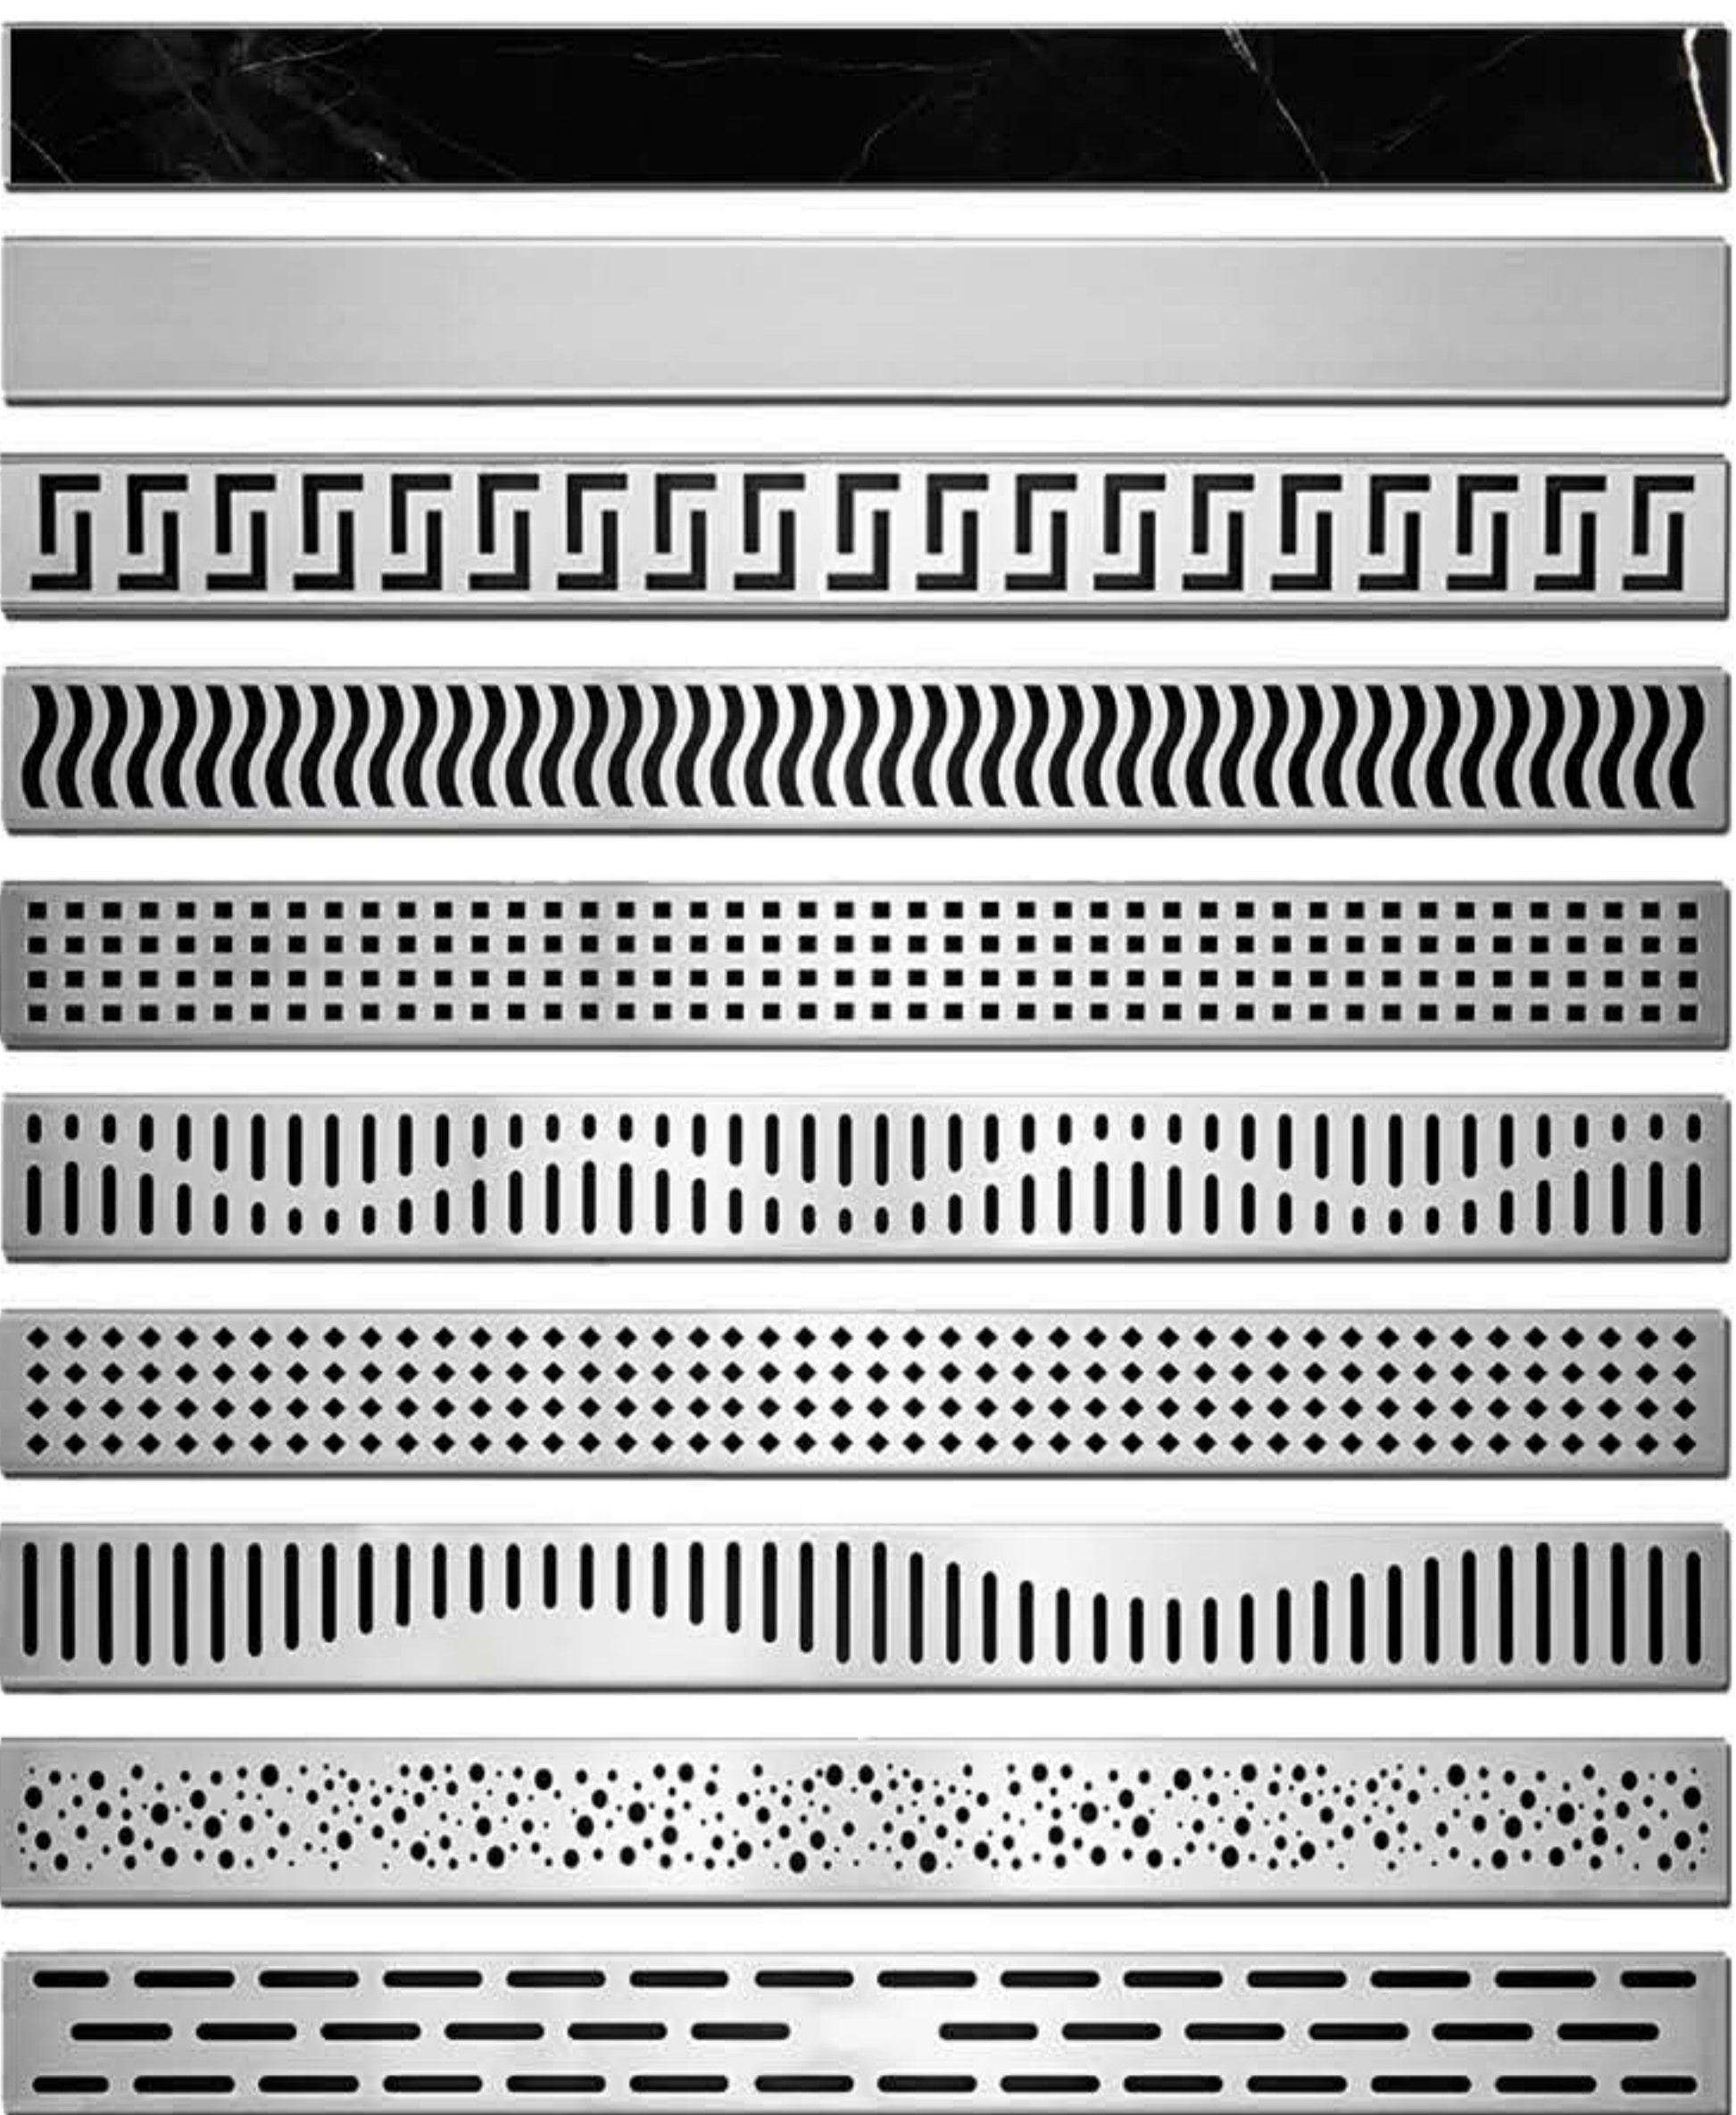

from 500 mm to 1200 mm

any lengths available
on request

KFL LOW LINEAR SHOWER DRAIN – METAL TRAP

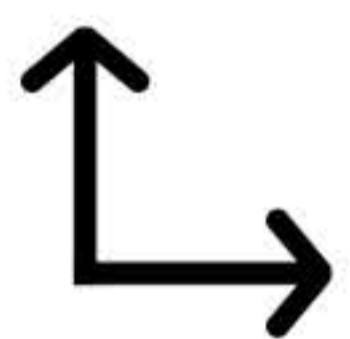

PRODUKT
POLSKI

PRODUCT DESCRIPTION

The linear shower drain of this sort is one of the lowest solutions available on the market: it will work perfectly with bathrooms with limited installation depth. Modern, minimalist design makes the drain match every single decor. Highest quality materials and a trap with a very high capacity guarantee reliability and durability.

BASIC FEATURES

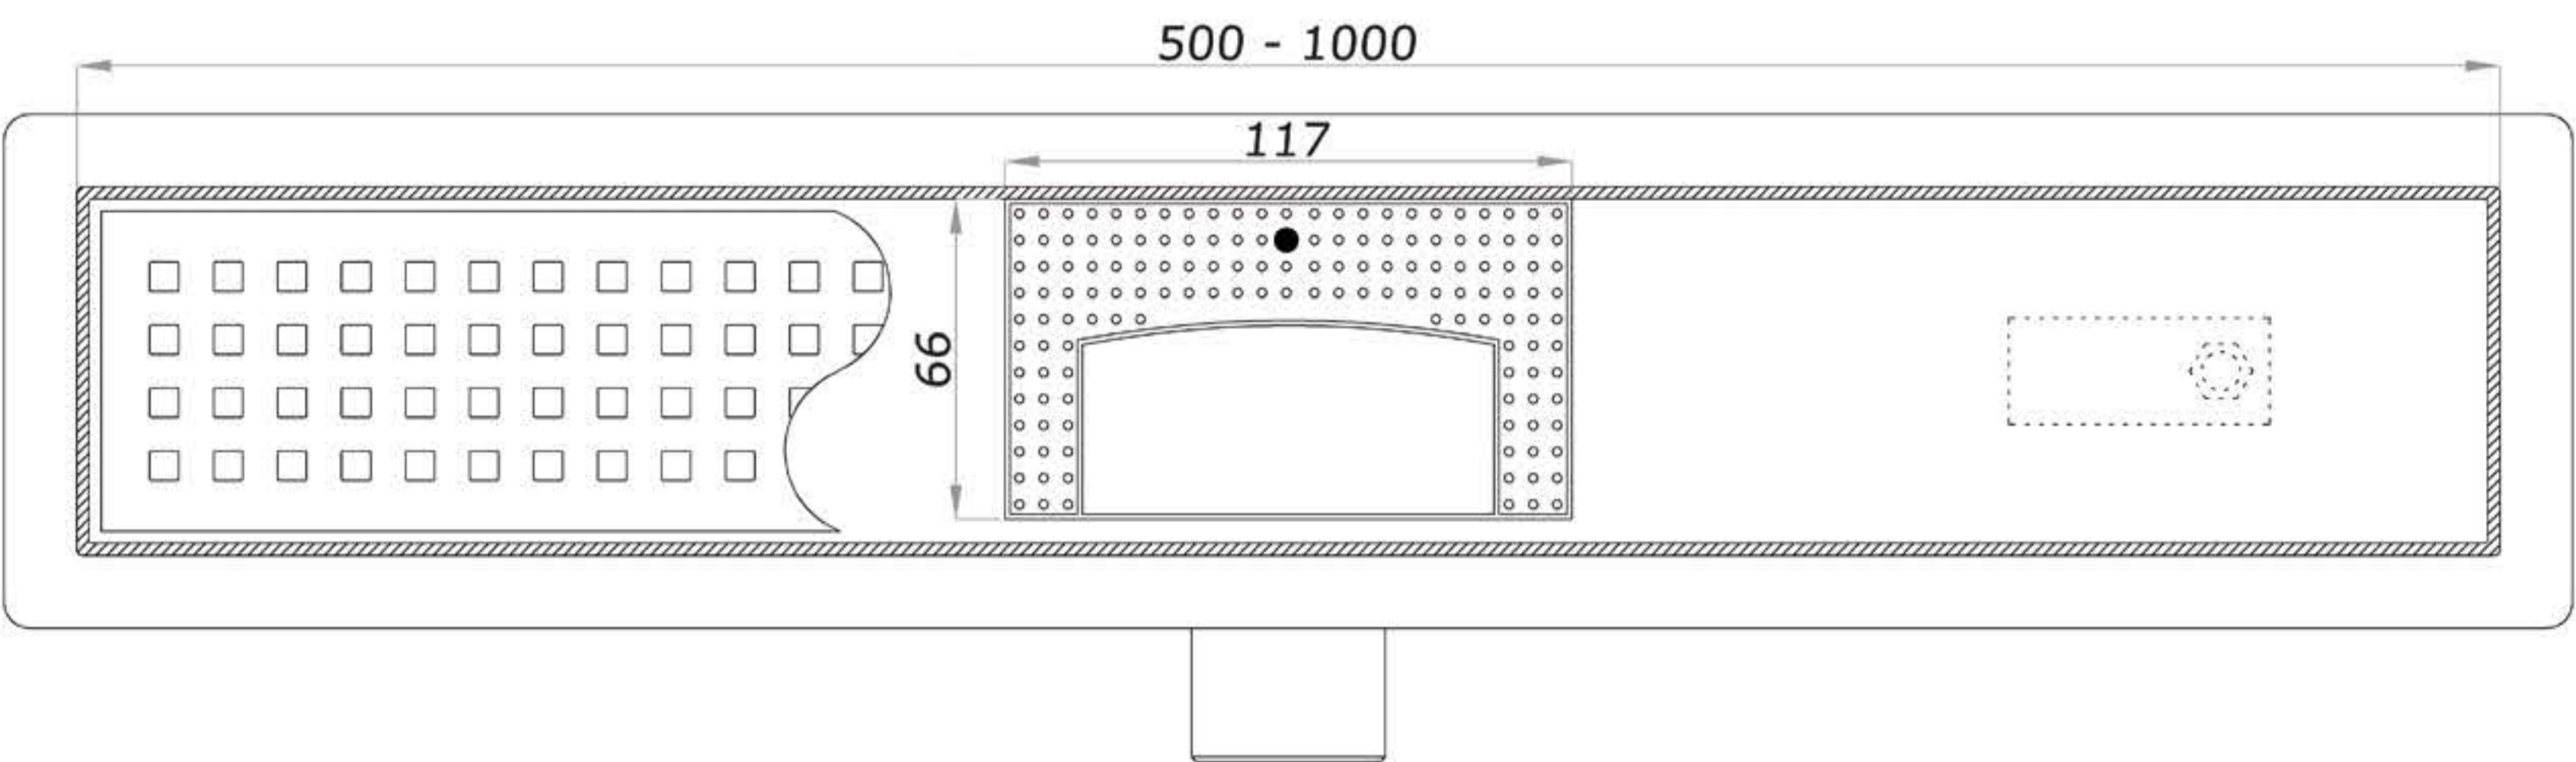

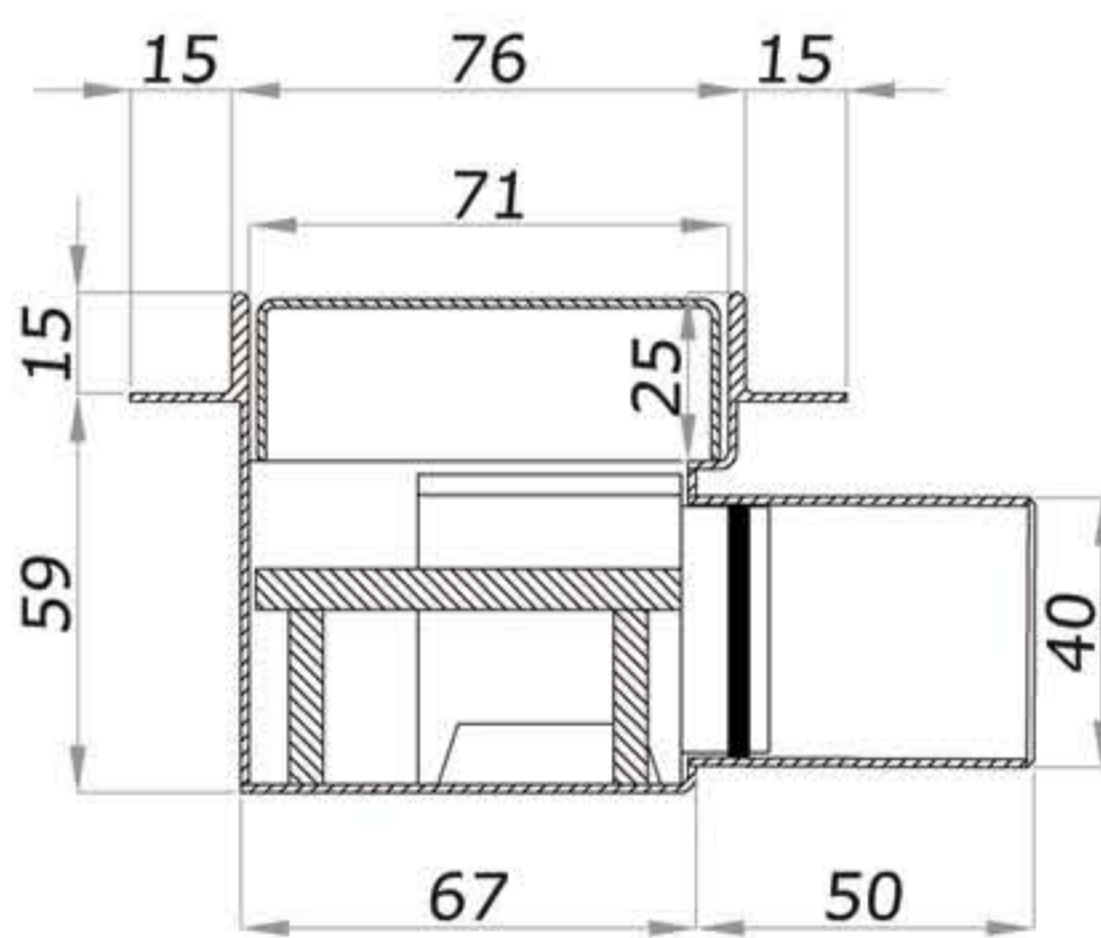

- stainless steel, 1.2 mm thick, grade 304 or 316 depending on the application
- stainless shower drain DN 40
- extra PVC adapter – DN 40/50
- settling tank catching all impurities
- fully cleaning and removable high-capacity trap
- low height of the drain – only 59 mm
- wide offer of drain covers (10 models) made of ground stainless steel
- possibility to personalise the pattern of the drain cover
- highly aesthetic finishing of visible elements
- a flange makes the shower drain perfectly tight along its entire circumference and makes installation easy
- a special watertight membrane required for correct installation
- feet making shower drain levelling easier
